# Non-market services — Sectoral Report

ADF TEST
ADF: -154.0349
p-value: 0.0000
The time series is Stationary (5% significance level)

Best Model: Model 0

Forecasted value for sectoral_VA_BdF 2019: 47.15
Forecasted value for sectoral_VA_BdF 2020: 45.02

# Non-market services — Model 0

```
                            OLS Regression Results

==============================================================================
Omnibus:                        1.572   Durbin-Watson:                   2.141
Prob(Omnibus):                  0.456   Jarque-Bera (JB):                1.000
Skew:                          -0.630   Prob(JB):                        0.607
Kurtosis:                       2.648   Cond. No.                     3.32e+03
==============================================================================

Notes:
[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.
[2] The condition number is large, 3.32e+03. This might indicate that there are
strong multicollinearity or other numerical problems.
