

# Market services — Sectoral Report

ADF TEST

ADF: -1.9286

p-value: 0.3187

The time series is Non-stationary (5% significance level)

Best Model: Model 0

Forecasted value for sectoral\_VA\_BdF 2019: 556.93

Forecasted value for sectoral\_VA\_BdF 2020: 507.51

| Omnibus:               | 8.942               |                     | Durbin-Watson:    |       |        | 1.731    |
| Prob(Omnibus):         | 0.011               |                     | Jarque-Bera (JB): |       |        | 5.014    |
| Skew:                  | 1.274               |                     | Prob(JB):         |       |        | 0.0815   |
| Kurtosis:              | 4.451               |                     | Cond. No.         |       |        | 1.72e+03 |

Notes:  
[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.  
[2] The condition number is large, 1.72e+03. This might indicate that there are strong multicollinearity or other numerical problems.
